- An online Hub for ongoing discussion, connection, and resources
- An opportunity to apply your PGR learning to practice through MyL3Plan™

**Registration Opening Soon:
Fall 2026 Beta Test Cohort**

About the Program

Practicing in Good Relations is a new collaborative learning program designed to strengthen family physicians' ability to recognize and respond to the structural conditions that shape Indigenous patients' health, healthcare experiences, and access to care.

Grounded in the Educating for Equity (E4E)™ Care Framework, the program brings together an interactive in-person workshop and a virtual case-based learning series focused on applying learning to everyday primary care practice.

About the Research

Practicing in Good Relations is being offered as part of a University of Alberta research study led by Dr. Stephanie Montesanti and funded by a CIHR 'Strengthening the Health Workforce' Team grant to evaluate the program.

Registering for Practicing in Good Relations will also mean registering to participate in the research study.

This activity has been certified by the College of Family Physicians of Canada and the Alberta Chapter for up to **14 Mainpro+® Certified Activity credits.**
