Top 10 tips for keeping your sanity with virtual care

#1

Try to create a space for your virtual care visits that gives you something you would not have if it was a “normal” clinic – reframe it to make it a win

TOP 10

Top 10 tips for keeping your sanity with virtual care

#2

Ask your staff to provide clear *technical* guidance to patients

#3

Consider using your website to guide patients on how to have a successful virtual visit

TOP 10

#4

Set clear expectations on what you can and cannot do virtually – this may not always be easy for your front-end staff so don't get upset, just rebook the patient for part two of their visit in the office

The logo consists of the words "TOP 10" in a stylized, neon-like font. The letters are outlined in a bright yellow and pink color, giving them a glowing appearance. The "10" is significantly larger than the word "TOP". The entire logo is set against a dark blue rectangular background.

#5

If a patient is clearly not prepared for your call (in the middle of a grocery store!?) just ask them to rebook or call them back later, rather than being agitated

#7

For low-risk patients who have “no showed,” ask your staff to re-book them in the office. Take a moment to coach them on the in-person visit with respect to how to use virtual care in the future, if you are willing to give it another chance

Top 10 tips for keeping your sanity with virtual care

#8

Get comfortable with pregnant pauses to allow patients to speak – we already interrupt too much in person. More difficult over the phone (when you lose body language cues)

#9

Consider how your staff can communicate with you when you are in virtual clinic – some EMRs can set a status, or use the message function and check in frequently
